

FRONT-OPENING COUNTERS

Secure transfers of documents and other items for a safer welcome

Front-opening counters are mainly used in sheltered outdoor area (guard stations, welcome stations, desks, etc.). They are large enough to securely transfer both large and small documents and packets and can provide protection against vandalism (some are even bullet-proof), offering compliance with the highest levels of certification (FB7NS). If required, certain models can be rendered fire-resistant. When used in conjunction with a full-duplex intercom system, there front-opening counter provides employees with complete protection against all kinds of physical attack, drafts and dust.

Our range includes several models combining glazing and document holder. Configurable in FB4/FB6 bulletproof resistance and/or 60 or 90 minutes fire resistance.
