

COIN- / BANKNOTE- HANDLING SYSTEM

DUETTO

References:
A74001 DUETTO banknote-/coin-
handling system

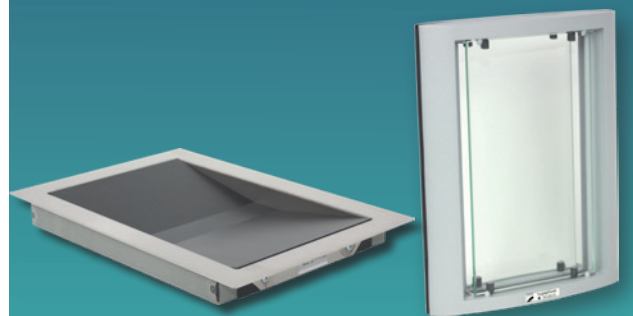

Secure transfers of documents and other items for a safer welcome

Banknote-/coin-handling systems can be installed with integrated pay windows, integrated into glass façades. These models can be used for transferring coins, notes, tickets or small documents from a secure interior area to an exterior area used by the general public. Some of these banknote handling systems can be surface-mounted onto reception desks and – because of the way in which they are configured – provide maximum protection against vandalism. Other models can be recessed into the work surface and can provide bullet-proof protection of up to FB4

These models can be used for passing banknotes and coins through glass façades or into secure areas. The Duetto model has been designed to be installed alongside the Duetto pay window without a transfer flap. These products are easy to install on a counter top work surface.

DO YOU KNOW?

Other models in the coin- / banknote- handling system range (fixed tray)

- Model 11 (vandalism proof)
- Model 12 FB4 (bullet-proof)
- Model 12 FB6 (bullet-proof)
