

COIN- / BANKNOTE- HANDLING SYSTEM

MODEL 11

Reference:
A30457 Model 11

Secure transfers of documents and other items for a safer welcome

Banknote-/coin-handling systems can be installed with integrated pay windows or across glass façades. These models can be used for transferring coins, notes, tickets or small documents from a secure interior area to an exterior area used by the general public. Some of these banknote-handling systems can be surface-mounted onto reception desks and – because of the way in which they are configured – provide maximum protection against vandalism. Other models can be recessed into the work surface and can provide bullet-proof protection of up to FB6(model 12)

This model can be used for banknotes, coins, tickets and documents and can be fitted into glass façades or secure areas. This product is easy to integrate into a counter type work surface.

DO YOU KNOW?

Other models in the coin- / banknote- handling system range (fixed tray)

- Duetto (vandalism proof)
- PT1 / PT2 (vandalism proof)
- Model 12 FB4 (bullet-proof)
